**CUSTOMS CLEARANCE & INVENTORY MANAGEMENT**

# Streamline international trade with tradePhlo's comprehensive solution

## Solution

tradePhlo is a cloud-based platform that simplifies international customs clearance and inventory management, providing businesses with complete control over their trade operations. The platform's range of innovative solutions makes it easier, cheaper, and faster for international traders to manage their customs requirements.

### Features

- Easy import & export customs clearance: Effortlessly create and manage import and export declarations through intuitive interfaces.

- Integrated inventory management: handle stock, purchases, sales, duty paid/liable stock & warehouses seamlessly.

- Single Interface for test & production: easily test and copy declarations, and seamlessly submit them to production environment within seconds.

- Duty & tax calculation: accurately calculate import duties, taxes for faster and smoother customs clearance.

- Tracking and visibility: get real-time insights and visibility into the status of shipments and customs clearance processes.

- Management dashboard: access predictive analytics and historical data to make informed decisions about supply chain and logistics strategies.

- Customs-data trained ChatGPT facility offers precise, 24/7 support, providing guidance tailored to specific customs requirements, regulations, and procedures.

### User benefits

- Streamlines customs clearance
- Simplifies inventory management
- Reduces compliance errors
- Improves supply chain visibility
- Enhances decision-making capabilities
- Saves time and resources
- Provides real-time tracking
- Optimises Import duties and vat
- Increases customs compliance
- Creates repeat declarations quickly
- Intuitive and user-friendly
- Seamless test/production interaction

### Multi-industry solution

tradePhlo is a powerful and versatile solution provisioned to meet the diverse demands of importer, exporters, hauliers, freight forwarders, transport companies and the customs intermediaries sector. tradePhlo capabilities provide great value and a competitive edge to today's fast-paced and competitive business landscape.

- GVMS integration: seamless integration with GVMS for generating the required GMRs and submitting them as part of the customs declaration process.

- Automated documentation: digitally volunteer documents to support clearance & compliance checks, reducing delays & manual processes.

- Goods classification: Automatically classify goods with AI-powered customs code recognition, reducing declaration time and avoiding compliance errors.

- Rules of origin: integrated algorithms and AI based tool to identify and apply rules of origin, ensuring compliance with trade agreements.
